## ThistlePro® selector guide

## **Finish Coat - Performance finish**

## Product ThistlePro FastSet Finish

Versatile fast setting finish plaster ideal for most backgrounds. Formulated to guarantee a high quality finish in less time ThistlePro DuraFinish

Versatile and hard wearing plaster ideal for most backgrounds. Proven 60% tougher than standard skims

Excellent resistance to glancing impacts or accidental damage

like scratching, gouging or chipping. Damage to small areas

does not spread or cause debonding, making repair easier

ThistlePro PureFinish

For use on a wide range of backgrounds. Provides a smooth, high quality surface to internal walls and ceilings

ings

ThistlePro PureFinish contains ACTIVair technology, designed specifically to improve indoor air quality and decomposes formaldehyde emissions into non-harmful inert compounds, thus eliminating the risk of re-emission

Applied the same as standard plaster with a minimum thickness of 3mm to enable magnetic attraction to any wall. For use on a wide range of backgrounds. It provides a smooth, high quality surface

ThistlePro Magnetic

Transform any wall into a surface that attracts magnets, making the ideal display board where what's on show can be endlessly changed. Perfect for children's bedrooms, schools, kitchens and offices

which attracts magnets to internal walls

Finish colour

**Product description** 

**Benefits of product** 

Where generally used

Provides a faster setting finish compared to

standard plasters, giving you a guaranteed way

to get the job done faster

Ideal for finishing ceilings and walls, reskims including painted reskims, plasterboard and backing coats

In high traffic areas at home, school or work. Ideal to use with Gyproc Habito and Gyproc DuraLine partitions with extra robustness requirements. Applied to most wall types including plasters and plasterboard

Ideally used in hospitals, schools, children's rooms and family homes where air quality for inhabitants is important.

Applied onto most wall types

Perfect for children's bedrooms, living areas and kitchens, in homes as well as schools, offices and meeting rooms

Preparation advice	For fastest finish, use a single mix for both first and		
-	second coat. Use Thistle GypPrime to control sucti		
	and Thistle Bond-it for an improved key		

Dampen dry undercoats first or where background suction is extremely high, use Thistle GypPrime. Once mixed, leave to sit for 5 mins, then re-mix a final time before applying

Dampen dry undercoats first or where background suction isextremely high, use Thistle GypPrime. Use Thistle Bond-it on moisture resistant boards and flat smooth concrete

Dampen dry undercoats first or where background suction is extremely high, use Thistle GypPrime. Use Thistle Bond-it on moisture resistant boards and flat smooth concrete

## Where to use - background surface: High Dry undercoats
