TR9007

820mm Wall Hung Frame and Cistern

Features

- Width - 500mm
- Adjustable depth - 167-215mm
- Adjustable height legs (200mm adjustment)
- WRAS approved 6/3L pneumatic flush valve
- WRAS approved side entry ½" (female) inlet valve
- Front access panel
- Polystyrene anti-condensation jacket
- 0.2-10.0 Bar working pressure range
- Brackets, fixings and 1st fix protective covers included
- Choose from TR9004 Ellipse flush plate or TR9003 square flush button for flush operation interface
- Choose the optional Furniture Adaptor Kit (TR9007) when using the frame in furniture installations

TR9005

Dimensions

1000mm Wall Hung Frame and Cistern

Features

- Width - 500mm
- Adjustable depth - 170-215mm
- Adjustable height legs (200mm adjustment)
- WRAS approved 6/3L pneumatic flush valve
- WRAS approved side entry ½" (female) inlet valve
- Top and front access options
- Polystyrene anti-condensation jacket
- 0.2-10.0 Bar working pressure range
- Brackets, fixings and 1st fix protective covers included
- Ideal for use below windows

TR9015

Dimensions

1170mm Wall Hung Frame and Cistern

Features

- Adjustable height legs (200mm adjustment)
- Adjustable depth - 140-200mm (for side or floor exit pipe runs)
- 6/3 litre pneumatic flush valve
- Side entry ½" male inlet valve
- Front access for maintenance
- 110mm min depth if pipe work routed straight through wall
- Polystyrene anti-condensation jacket
- 0.2-10.0 bar working pressure range
- Brackets, fixings and 1st fix protective covers included
- Compatible with pneumatic flush plates & buttons (sold separately)

Secure-Fix **QR**

INST03004-SF (Secure Fix)

Dimensions

Secure Fix - How Does it Work?

1 Place the template

Place the template over the anchor pins on the pan.

2 Select the correct position

Select the appropriate hole by measuring the required distance from the template to front of pan or using the holes stated.

3 Insert the bolts

Insert the bolts into the correct holes and tighten.

4 Cover & click

Add the cover plate and click the seat into place.

Toilet Seat Hinge Types

Quick Release Hinges

Easy to operate quick release hinges are featured on some toilet seats, allowing the seat to be lifted away easily, leaving clear access to clean hard to reach surfaces.

Soft Close Hinges

The hydraulic hinge mechanism ensures controlled and quiet closure of the seat lid and ring. Mechanisms are extensively tested to ensure long life.

Top Fix Hinges

Some seats feature a special 'top fix' hinge allowing them to be quickly and easily installed on modern WC pans.

Ideal OpenTherm Wired Room Thermostat

2 Year warranty
as standard*

Simple dial and
button design

Backlit colour screen
with large text and icons

Compliments the
mechanical timer

Boiler plus compliant

Wired power
No batteries

Specifically designed to work with the Instinct² by providing temperature control and boiler plus compliance in one simple device.

Boiler Plus

Boiler Plus is a set of standards implemented in England in April 2018. The boiler should have an ErP efficiency of at least 92%, and time and temperature controls should be installed. For replacement combi boilers an additional energy efficiency measure is needed, such as enhanced load compensation.

The Instinct² boiler is over 92% efficiency and has built in time control with the mechanical timer. The Ideal OpenTherm Wired Room Thermostat provides temperature control and Enhanced Load Compensation. The perfect combination to comply with Boiler Plus.

Features

- 2 year warranty • Simple dial and button design
- Backlit colour screen with large text and icons
- Easy temperature control
- Compliments the mechanical timer • Boiler Plus compliant
- Wired power (no batteries) using the OpenTherm connection
- Slim, modern design • Easy install • Trim plate

Condensate Removal Pump

One-piece centrifugal pump with tank.

- Centrifugal pump for heavy and contaminated condensates
- Suitable for gas condensing boilers producing acid (pH > 2.5) and hot condensates (65°C max, 80°C in short peak)
- Normally closed alarm contact that automatically cuts off the air conditioning system compressor or a solenoid valve

Features

- 4 fixing slot holes that allow the pump to be attached either on a wall or hanging from a ceiling (on M8 or smaller screw thread size)
- 4 inlets Ø30mm
- Quarter turn easily removable check valve, for PVC tubing 10 mm (3/8") or 6 mm (1/4")
- Low sound level – quiet operation
- Easily removable tank and reversible pump
- Oil and acid resistant float
- Reinforced mechanical structure improving shocks resistance
- High discharge head
- High flow rate for shorter running time
- Thermal protection 105°C auto-rese

Kit Contents

- Integrated tank pump of 2,0 l
- Integrated check valve
- Power cable – 2,0 m European plug (L,N,G)
- Alarm wires – 1,0 m
- PVC Tubing – 5m roll - 10 mm ID
- ACC02040 Ø 1" - 1 1/4" - 1 1/2" (24-32-40m) adapter
- 2 screws + plug

Compact Radiators

With a slim profile and smooth, white finish, Compact radiators will blend into any room in the house, to provide guaranteed heating performance.

Features

- Henrad Compact Range has been independently tested to ensure these radiators perform to a maximum working pressure of 10 Bar
- Henrad Compact has 4 x ½" BSP connections as standard
- Two coat paint process, each Henrad radiator is subjected to a multi-stage cleaning and paint process. The final powder coat is Traffic white (RAL A9016) which is stoved and cooled to give a perfect finish All radiators are illustrated in Traffic white unless stated
- Installation of the system should be properly flushed and fitted in accordance with the British Code of Practice for the Treatment of Water in Domestic Hot Water Central Heating Systems
- Tested to withstand 10.0 Bar

Guarantee

- 10 Years

Compact K3 Radiators

The Compact K3 is the ideal choice for low energy systems, providing outstanding heat output from a smaller footprint.

Features

- Henrad Compact K3 has been independently tested to ensure these radiators perform to a maximum working pressure of 10.0 Bar
- Henrad Compact K3 has 4 x ½" BSP connections as standard
- Two coat paint process, each Henrad radiator is subjected to a multi-stage cleaning and paint process. The final powder coat is Traffic white (RAL 9016) which is stoved and cooled to give a perfect finish. All radiators are illustrated in Traffic white unless stated
- Installation of the system should be properly flushed and fitted in accordance with the British Code of Practice for the Treatment of Water in Domestic Hot Water Central Heating Systems
- Tested to withstand 10.0 Bar

Guarantee

- 10 Years

22mm Curved Bar
Towel Rail

Magnetic Scale Inhibitor

The new range of Instinct Scale Inhibitors are manufactured by Scalemaster® in the UK and incorporate the original Scalemaster® patented technology.

Copper Mesh Enhances Limescale Inhibitor Performance

Scalemaster® (and Instinct) in-line limescale inhibitors incorporate an active element (magnet or zinc anode) encased in pure copper mesh. The mesh increases the surface area of copper in contact with the water passing through the unit which enhances the electrochemical effect (removal of dissolved oxygen and treatment to prevent limescale precipitation). Only Scalemaster® products use this technology (Patent No. 2285936) which has been proven in independent tests (by British Gas R&D) to extend boiler life typically by 50% by preventing scale build up in hard water areas (Copy of letter of endorsement of performance attached).

The copper mesh – zinc/magnet anode pair reduces the water flow rate through the unit by less than 1%.

Features

- Slip Couplings for easy fit • Earth bonding not required
- Needs no chemicals or power • Easily installed
- No moving parts, no maintenance required
- Manufactured in the UK by Scalemaster® Limited
- Scalemaster® patented technology
- WRAS Approved Product
- Single appliance protection
- Saves on energy costs

IN-100 Corrosion Inhibitor

Features

Prevents corrosion, hard water limescale precipitation and is essential for protecting hot water heating systems and maintaining operational efficiency.

504513

300ml

504421

500ml

504582

5 Litre

IN-300 System Cleaner

Features

For commissioning new heating systems. Removes installation foulants, flux, grease and debris suspended in water by flushing. Should be left in system min 2 hours, max 2 weeks.

504520

300ml

504445

500ml

504599

5 Litre

IN-500 Leak Sealer

Features

For the internal sealing of inaccessible leaks and weeping joints. Forms a soft seal within 24 hours. Will not cause blockages in circulatory pumps or air vents.

504537

300ml

504469

Real-time measurement of corrosion inhibitor protection, on-site, in under 5 minutes!

(For annual testing compliance with BS7593:2019)

Works with
all chemical
inhibitors

*Phone not included.

**Real-time measurement of corrosion inhibitor
protection, on-site, in under 5 minutes!**

(For annual testing compliance with BS7593:2019)

Are you British Standard Compliant?

Poor water quality is the most common root cause of central heating breakdowns. It is now a requirement of BS 7593:2019 to carry out an annual check of heating system water quality as part of the system maintenance programme.

What is BS 7593:2019 and why is it important?

BS7593 is the British Standard code of practice for the preparation, commissioning and maintenance of domestic central heating and cooling water systems. It applies to individual domestic properties when commissioning a new system for the first time, re-commissioning following the installation of a new boiler, or any other major remedial work on the heating system.

The latest iteration, (BS 7593:2019) came into effect on 31 May 2019. Compliance is a regulatory requirement within Part L of Building Regulations and includes carrying out a check on inhibitor level to prevent corrosion.

Scalemaster® i-Test® - Inhibitor Tester

Scalemaster® i-Test® provides a revolutionary way to check if the heating system water is healthy and there is sufficient active inhibitor present to provide adequate protection against corrosion on metals typically in a system. It doesn't just check if there is some chemical in the water - It provides a real-time measurement of corrosion protection provided in reference to the target performance levels of the NSF CIAS tests.

Unlike single dipstick tests, i-Test® will show:

- The level of corrosion protection provided by any inhibitor present
- If there are any other chemicals (such as system cleaner) or flux residues present working against the inhibitor to increase corrosion
- If the corrosion in a system is actually worse than in the tap water used to fill it!

6 Simple Steps to Check Corrosion Inhibitor Protection

Step 1
Download the app

Step 2
Clean the probe

Step 3
Insert the probe

Step 4
Check tap water

Step 5
Test system water

Step 6
Generate report

Test Methodology

i-Test works by measuring the corrosion between two different metals (iron and copper) suspended in a small sample of system water. The signalling unit sends data to a free-to-download App on your smartphone which decodes and processes the data to

generate a report which can immediately be sent to the customer or printed on a local printer.

Download the instructions and watch the video at www.i-test.com or www.Scalemaster.co.uk

On-site testing of corrosion inhibitor protection for BS7593:2019 in 5 minutes...

...the inhibitor test that works with all chemical inhibitors

*Phone not included.

Magnetic Filter (with Isolation Valves)

The Instinct ECO-Mag magnetic central heating filter is the ideal solution to help combat against costly and unnecessary system breakdowns caused by both magnetic and non ferrous particulate in fluid based systems. The Instinct ECO-Mag can be used on all types of central heating systems and it is recommended, for maximum effect, that the filter be fitted on the return leg of the system, between the last radiator and the boiler.

Features

- Actively filters magnetite and non ferrous debris
- 12000 gauss removable magnet
- 120°C max working temperature
- 6 bar max working pressure
- Manual air bleed
- Installation/servicing date wheel
- Supplied with a full set of spare sealing washers & o rings
- Hard wearing POM non ferrous filter
- Full bore isolating ball valves on inlet and outlet connections
- 360° rotatable filter pot
- Effortless servicing and fitting

Guarantee

- 2 Years

Safety Precautions For Drilling

Most General Building Materials
Such As Facing Brick, Block, etc.

With Helix barrel design for dust clearance, and turbo segment technology for a faster, leaner cut.

Drilling Method

- Pre-drill 13mm pilot hole
- Insert guide rod into core bit
- Using rotary action (no hammer), drill hole, regularly withdrawing bit to clear dust build-up
- Can be used with dust extraction system (ask supplier for details)

General Guide to Speed Settings for Dry Cores

Omat® Soldering & Brazing Pad

250mm (10") Soldering & Brazing Pad

The INST2361 OMAT® is a patented, slotted protection mat for soldering pipes and tubes to protect walls, cables, carpets and other flammable material. The OMAT® slot has an overlap at the back which enables the protective mat to go either side of the tube or pipe being soldered so as to protect the surrounding area from burning or scorching as well as reducing the risk of fire. It is particularly useful under kitchen units and on pipes perpendicular to the wall where the use of a non-slotted mat would not easily cover the area. The OMAT® is designed for use on pipes and tubes 15 to 22mm diameter.

150mm (6") Soldering & Brazing Pad is a patented, slotted protection mat or pad for soldering and brazing 15mm and 22mm copper tube and pipe. The size of the mat is 150mm x 150mm (6" x 6") for use in really awkward places where the larger sizes of Omat® would obstruct easy access of the soldering torch. It is designed to protect walls, cables, carpets and other flammable material surrounding a pipe being soldered/brazed. The slot in the Monument 2363L Micro Omat® has an overlap at the back which enables the protective mat to go either side of the tube or pipe being soldered/brazed so as to protect the surrounding area from burning or scorching, as well as reducing the risk of fire. It is particularly useful under kitchen units and on pipes perpendicular to the wall where the use of a non-slotted mat would provide inadequate cover of the area to prevent damage.

**15mm & 22mm Copper
Pipe Bender
(with Guides)**

The INST2600 15mm and 22mm Copper Pipe Bender is designed to professionally bend BSEN1057 15mm 22mm copper pipe and 15mm stainless steel tube. The aluminium formers are marked with bending angles of 30 45 and 90 degree offsets allowing for accurate bending. The Trade Instinct Pipe Bender is supplied with replaceable 15mm and 22mm aluminium bending guides.

Additionally there is a power tool drive to make this indispensable tool even more useful! JUST REMEMBER TO HAVE YOUR DRILL SET TO DRIVE NOT REVERSE.

15mm & 22mm Compression Fitting Olive Puller

The INST2036 works by engaging the tool in the end of the copper pipe and then winding the appropriate bush - 15mm and 22mm included - counter clockwise until it stops at the olive to be removed. The threaded bush is then screwed into the compression nut which is held captive on the pipe on the other side of the olive. Then by rotating the handle clockwise the compression fitting nut is drawn up the pipe and pulls the olive off the pipe without damaging it.

INST2036

Quantity 1

22mm Compression Fitting Olive Cutter

INST2031

Quantity 1

15mm Compression Fitting Olive Cutter

The INST2030 15mm and INST2031 22mm are designed to remove an olive from copper pipe without damage to the pipe and without producing swarf. The latest version includes replaceable, interchangeable and reversible tungsten carbide blades.

Not for use on steel olives.

INST2030

Quantity 1

30mb Gas Test Gauge

The INST0257 30mb Gas Test Gauge is Made in Britain and is made from tough plastic. It is used both for testing pipework installations with air for leaks before the introduction of gas and for checking and setting correct gas pressures on domestic and commercial appliances. Extruded cover slides off and may be clipped over the base for standing the tool vertically during use. Hanging tab permits vertical hanging from suitable protrusions. Marked in millibars, the scale adjusts for zeroing the water level.

INST0257

Quantity 1

Mains Water Pressure Test Gauge 11 Bar x 3/4" BSP

INST1510

Quantity 1

Dry Test Kit 15mm x 4 Bar

The INST1512 Pipe Dry Testing Kit is ideal for dry testing pipe work during and after installation. It has a easy to read triple scale bar, psi and kPa and is suitable for water, air, gas and petroleum oil pipes up to 4 bar, and for testing combi systems. Can be left on test, while flooring is laid to reveal any nail damage also test hot and cold supplies separately to ensure pipes are not crossed. Fitted with a Schrader Valve and 15 mm push fit fitting for quick and easy assembly and has a rubber boot for added protection.

Monument Masters SweatBOX®

The SweatBOX® is the ultimate plumbers soldering tray.

The SweatBOX® features a flame retardant engineering grade plastic with a patented clamp for holding different sizing of copper pipe up to 22mm or ¾".

Features

- There is a silicone strip edge to the SweatBOX® ensuring heat is not conducted from the hot copper pipe to the plastic of the SweatBOX® or the clients property
- Adhesive rubber feet are included, helping to prevent scratches to surfaces
- The sealed compartments are ideal for holding a gas bottle, separated blowtorch and all the essentials needed for soldering or sweating a joint
- There's even a compartment for flux brushes

Guarantee

- 1 Year
