

# **Gyproc<sup>®</sup>** ThermaLine Plus

SAFETY DATA SHEET

# SAFETY DATA SHEET

# Gyproc ThermaLine Plus

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of	SECTION 1: Identification of the substance/mixture and of the company/undertaking		
1.1. Product identifier			
Product name	Gyproc ThermaLine Plus		
1.2. Relevant identified uses of the substance or mixture and uses advised against			
Identified uses	Thermal or sound insulating internal linings in buildings.		
Uses advised against	No specific uses advised against are identified.		
1.3. Details of the supplier of the safety data sheet			
Supplier	British Gypsum East Leake Loughborough Leicestershire LE12 6HX UK T: +44 (0) 115 945 6123 E: bgtechnical.enquiries@bpb.com		
1.4. Emergency telephone nu	mber		
Emergency telephone	+44 (0) 115 945 6123 8:30am - 5:00pm Monday - Friday (GMT)		
SECTION 2: Hazards identified	SECTION 2: Hazards identification		
2.1. Classification of the substance or mixture			
2.1. Classification of the subs	tance or mixture		
2.1. Classification of the subs Classification (EC 1272/2008			
Classification (EC 1272/2008	<u>)</u>		
Classification (EC 1272/2008 Physical hazards	) Not Classified		
Classification (EC 1272/2008 Physical hazards Health hazards	) Not Classified Not Classified		
Classification (EC 1272/2008 Physical hazards Health hazards Environmental hazards	Not Classified Not Classified Not Classified Harmful dust may be released during cutting or grinding process. Dust may irritate the eyes and the respiratory system. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases. Sharp edges and corners may cause cuts and

Classification (EC 1272/2008 Physical hazards Health hazards Environmental hazards Human health	Not Classified Not Classified Not Classified Harmful dust may be released during cutting or grinding process. Dust may irritate the eyes and the respiratory system. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases. Sharp edges and corners may cause cuts and abrasions. Contact with hot product can cause serious thermal burns.		

# **Gyproc ThermaLine Plus**

This product does not contain any substances classified as PBT or vPvB. Extruded Polystrene (XPS) and XPS dust is organic. May form combustible dust concentrations in air. Avoid handling which leads to dust formation.

SECTION 3: Composition/info	rmation on ingredients	
3.2. Mixtures		
Calcium sulfate dihydrate		50 - 100%
CAS number: 7778-18-9	EC number: 231-900-3	REACH registration number: 01- 2119444918-26-XXXX
Substance with National work	place exposure limits.	
Classification Not Classified		
Extruded Polystyrene (XPS)		15 - 35%
CAS number: 9003-53-6		
Classification Not Classified		
The full text for all hazard state	ements is displayed in Section 16.	
Composition comments	Calcium sulphate dihydrate encased in paper liners with a thermal laminate bonded to the back. Natural plasterboard constituents may include clay and minor amounts of quartz. Small quantities of chopped glass fibre, microsilica and vermiculite may be added, with starch, foam and dispersants. Gyproc ThermaLine Plus includes an extruded polystyrene insulant.	
SECTION 4: First aid measure	95	
4.1. Description of first aid me	asures	
General information	Get medical attention if any discomfort con personnel.	tinues. Show this Safety Data Sheet to the medical
Inhalation		exposure by this route is unlikely. IF INHALED: o warm and at rest in a position comfortable for

Ingestion	Due to the physical nature of this product, it is unlikely that ingestion will occur. IF SWALLOWED: Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. Never give anything by mouth to an unconscious person. If in doubt, get medical attention promptly.
	feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. Never give anything by mouth to an unconscious person. If in doubt, get

breathing. If in doubt, get medical attention promptly.

Skin contact Wash skin thoroughly with soap and water. Get medical attention if symptoms are severe or persist after washing. Contact with hot product can cause serious thermal burns. Following contact with hot product, immediately immerse in or flush the affected area with large amounts of cold water to dissipate heat and cover with clean cotton sheeting or gauze. Chemical burns must be treated by a physician.

Eye contact Due to the physical nature of this product, exposure by this route is unlikely. IF IN EYES: Remove any contact lenses and open eyelids wide apart. Rinse with water. Do not rub eye. Get medical attention if symptoms are severe or persist after washing.

Protection of first aiders First aid personnel should wear appropriate protective equipment during any rescue.

# 4.2. Most important symptoms and effects, both acute and delayed

General information	The product is considered to be a low hazard under normal conditions of use. See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	No specific symptoms known. Due to the physical nature of this product, exposure by this route is unlikely. Harmful dust may be released during cutting or grinding process. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases.
Ingestion	No specific symptoms known. May cause discomfort. Harmful dust may be released during cutting or grinding process.
Skin contact	Prolonged or repeated contact with skin may cause irritation, redness and dermatitis. Sharp edges and corners may cause cuts and abrasions. Contact with hot product can cause serious thermal burns.
Eye contact	Particles in the eyes may cause irritation and smarting.
4.3. Indication of any immediat	te medical attention and special treatment needed
Notes for the doctor	Treat symptomatically.
Specific treatments	No special treatment required.
SECTION 5: Firefighting meas	sures
5.1. Extinguishing media	
Suitable extinguishing media	Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire- extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising fro	om the substance or mixture
Specific hazards	Extruded Polystyrene (XPS): Dust may form explosive mixture with air. Heating may generate flammable vapours. Contact with hot product can cause serious thermal burns. In case of a fire involving the product, firefighters shall be informed that polystyrene is involved.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. Oxides of sulphur. Carbon dioxide (CO2). Carbon monoxide (CO). Styrene monomer.
5.3. Advice for firefighters	
Protective actions during firefighting	Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.
<b>SECTION 6: Accidental releas</b>	e measures

# 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautionsProvide adequate ventilation. Keep unnecessary and unprotected personnel away from the<br/>spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Avoid<br/>inhalation of dust. Avoid contact with eyes. No smoking, sparks, flames or other sources of<br/>ignition near spillage. Wash thoroughly after dealing with a spillage.

# 6.2. Environmental precautions

# **Environmental precautions**The product is not expected to be hazardous to the environment. Insoluble in water. Aquatic toxicity is unlikely to occur. However, large or frequent spills may have hazardous effects on the environment. Collect spillage. Avoid discharge to the aquatic environment. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

# 6.3. Methods and material for containment and cleaning up

Methods for cleaning upWear protective clothing as described in Section 8 of this safety data sheet. Clear up spills<br/>immediately and dispose of waste safely. Reuse or recycle products wherever possible.<br/>Approach the spillage from upwind. Collect spillage. Avoid generation and spreading of dust.<br/>Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage.<br/>Do not empty into drains. Dispose of waste to licensed waste disposal site in accordance with<br/>the requirements of the local Waste Disposal Authority.

#### 6.4. Reference to other sections

**Reference to other sections** For personal protection, see Section 8. See Section 11 for additional information on health hazards. For waste disposal, see Section 13.

# **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

Usage precautions	Read and follow manufacturer's recommendations. Do not handle until all safety precautions have been read and understood. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use only non-sparking tools. Avoid handling which leads to dust formation. Avoid generation and spreading of dust. Prevent accumulation of dust. Avoid inhalation of dust. Use mechanical ventilation if there is a risk of handling causing formation of airborne dust.
Advice on general occupational hygiene	Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
7.2. Conditions for safe storage	e, including any incompatibilities
Storage precautions	Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Keep in a cool, well ventilated place. Store in a dry place. Do not store near heat sources or expose to high temperatures. Keep away from flammable and combustible materials.
Storage class	Unspecified storage.
7.3. Specific end use(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.
SECTION 8: Exposure control	s/Personal protection

### 8.1. Control parameters

#### Occupational exposure limits

Comments

Exposure to these ingredients as inhalable or respirable dust is minimal during normal use. Avoid handling which leads to dust formation.

#### Calcium sulfate dihydrate

Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m<sup>3</sup> respirable dust

#### Quartz (SiO2)

Long-term exposure limit (8-hour TWA): WEL 0.1 mg/m<sup>3</sup> respirable dust [Listed as: Silica, respirable crystalline]

# Quartz (SiO2)

Long-term exposure limit (8-hour TWA): WEL 6 mg/m<sup>3</sup> inhalable dust Long-term exposure limit (8-hour TWA): WEL 2.4 mg/m<sup>3</sup> respirable dust [Listed as: Silica, amorphous]

# Glass fibre

Long-term exposure limit (8-hour TWA): WEL 5 mg/m<sup>3</sup> 2 fibres/ml Long-term exposure limit (8-hour TWA): WEL 10 mg/m<sup>3</sup> inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m<sup>3</sup> respirable dust

# Formaldehyde

Long-term exposure limit (8-hour TWA): WEL 2 ppm 2.5 mg/m<sup>3</sup> Short-term exposure limit (15-minute): WEL 2 ppm 2.5 mg/m<sup>3</sup>

#### Silicon dioxide

Long-term exposure limit (8-hour TWA): WEL 2.4 mg/m<sup>3</sup> respirable dust Long-term exposure limit (8-hour TWA): WEL 6 mg/m<sup>3</sup> inhalable dust WEL = Workplace Exposure Limit.

## Calcium sulfate dihydrate (CAS: 7778-18-9)

DNEL	Workers - Inhalation; Long term systemic effects: 21.17 mg/m <sup>3</sup> Workers - Inhalation; Short term systemic effects: 5082 mg/m <sup>3</sup> General population - Inhalation; Long term systemic effects: 5.29 mg/m <sup>3</sup> General population - Inhalation; Short term systemic effects: 3811 mg/m <sup>3</sup> General population - Oral; Long term systemic effects: 1.52 mg/kg/day General population - Oral; Short term systemic effects: 11.4 mg/kg/day
PNEC	STP; 100 mg/l
8.2. Exposure controls	
Appropriate engineering controls	Provide adequate ventilation. Harmful dust may be released during cutting or grinding process. Use mechanical ventilation if there is a risk of handling causing formation of airborne dust. Observe any occupational exposure limits for the product or ingredients.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Wear tight-fitting, dust-resistant, chemical splash goggles if airborne dust is generated. Personal protective equipment for eye and face protection should comply with European Standard EN166.
Hand protection	For prolonged or repeated use: Wear protective gloves. During cutting, grinding or sanding operations, wear protective gloves if handling sharp or rough edges.
Hygiene measures	Good personal hygiene procedures should be implemented. When using do not eat, drink or smoke.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Harmful dust may be released during cutting or grinding process. Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit. Wear a suitable dust mask. Disposable filtering half mask respirators should comply with European Standard EN149 or EN405. Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly.
Environmental exposure controls	Avoid generation and spreading of dust.

# **SECTION 9: Physical and chemical properties**

	F. F. T	
9.1. Information on basic physical and chemical properties		
Appearance	Flat sheet boards in different thicknesses with a tapered edge.	
Colour	Grey. / Orange.	
Odour	Odourless.	
Odour threshold	No information available.	
рН	Not relevant.	
Melting point	Extruded Polystyrene (XPS): 240°C	
Initial boiling point and range	Not relevant.	
Flash point	Extruded Polystyrene (XPS): >300°C	
Evaporation rate	Not relevant.	
Evaporation factor	Not relevant.	
Flammability (solid, gas)	Not determined.	
Upper/lower flammability or explosive limits	Not determined.	
Other flammability	Not determined.	
Vapour pressure	Not relevant.	
Vapour density	Not relevant.	
Relative density	Not determined.	
Bulk density	Not determined.	
Solubility(ies)	Insoluble in water. Extruded Polystyrene (XPS): Soluble in the following materials: Organic solvents.	
Partition coefficient	Not determined.	
Auto-ignition temperature	Not determined.	
Decomposition Temperature	Extruded Polystyrene (XPS): 345-360°C	
Viscosity	Not relevant.	
Explosive properties	Not considered to be explosive.	
Oxidising properties	Does not meet the criteria for classification as oxidising.	
9.2. Other information		
Softening point	Extruded Polystyrene (XPS): 85°C	
SECTION 10: Stability and reactivity		
10.1. Reactivity		
Reactivity	There are no known reactivity hazards associated with this product.	
10.2. Chemical stability Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the	
	prescribed storage conditions.	

10.3. Possibility of hazardous reactions

Possibility of hazardous reactions	No potentially hazardous reactions known.	
10.4. Conditions to avoid		
Conditions to avoid	Avoid generation and spreading of dust. Avoid exposure to high temperatures or direct sunlight. Keep away from heat, sparks and open flame.	
10.5. Incompatible materials		
Materials to avoid	Avoid contact with the following materials: Organic solvents. Aldehydes. Amines. Esters. Oils. Coal tar, pitch and creosote.	
10.6. Hazardous decomposition products		
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Oxides of sulphur. Carbon monoxide (CO). Carbon dioxide (CO2). Styrene monomer.	
SECTION 11: Toxicological information		

# SECTION 11: Toxicological information

11.1. Information on toxicological effects		
Toxicological effects	Not regarded as a health hazard under current legislation.	
Acute toxicity - oral		
Summary	Based on available data the classification criteria are not met.	
Acute toxicity - dermal		
Summary	Based on available data the classification criteria are not met.	
Acute toxicity - inhalation		
Summary	Based on available data the classification criteria are not met.	
Skin corrosion/irritation		
Summary	Based on available data the classification criteria are not met.	
Serious eye damage/irritation		
Summary	Based on available data the classification criteria are not met.	
Respiratory sensitisation		
Summary	Based on available data the classification criteria are not met.	
Skin sensitisation		
Summary	Based on available data the classification criteria are not met.	
Germ cell mutagenicity		
Summary	Based on available data the classification criteria are not met.	
Carcinogenicity	Based on available data the classification criteria are not met.	
Summary		
Reproductive toxicity Summary	Based on available data the classification criteria are not met.	
-		
Specific target organ toxicity -		
Summary	Based on available data the classification criteria are not met.	
Specific target organ toxicity -	repeated exposure	
Summary	Based on available data the classification criteria are not met.	
Aspiration hazard		

Summary	Not relevant. Solid.
General information	The product is considered to be a low hazard under normal conditions of use. No specific health hazards known. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	No specific symptoms known. Harmful dust may be released during cutting or grinding process. Frequent inhalation of dust over a long period of time increases the risk of developing lung diseases.
Ingestion	No specific symptoms known. May cause discomfort. Harmful dust may be released during cutting or grinding process.
Skin contact	Prolonged or repeated contact with skin may cause irritation, redness and dermatitis. Sharp edges and corners may cause cuts and abrasions.
Eye contact	Particles in the eyes may cause irritation and smarting.
Route of exposure	Dermal Inhalation Harmful dust may be released during cutting or grinding process.
Target organs	No specific target organs known.

Toxicological information on ingredients.

# Calcium sulfate dihydrate

Toxicological effects	The toxicity of this substance has been assessed during REACH registration. Not regarded as a health hazard under current legislation.
Acute toxicity - oral	
Notes (oral LD₅₀)	LD₅₀ >2000 mg/kg, Oral, Rat
Acute toxicity - inhalation	
Notes (inhalation LC50)	LC₅₀ >3.26 mg/l, 4 hours, Dust/Mist Rat
Skin corrosion/irritation	
Animal data	Dose: 0.5 g, 4 hours, Rabbit Erythema/eschar score: No erythema (0). Oedema score: No oedema (0). Not irritating.
Serious eye damage/irritat	ion
Serious eye damage/irritation	Dose: 100 mg, , Rabbit Not irritating.
Skin sensitisation	
Skin sensitisation	Buehler test - Guinea pig: Not sensitising.
Germ cell mutagenicity	
Genotoxicity - in vitro	Bacterial reverse mutation test: Negative.
Genotoxicity - in vivo	DNA damage and/or repair: Negative.
Carcinogenicity	
Carcinogenicity	Based on available data the classification criteria are not met.
Reproductive toxicity	
•	

Summary This substance has no evidence of toxicity to reproduction.

Specific target organ toxicity - single exposure

	STOT - single exp	Not classified as a specific target organ toxicant after a single exposure.
	Specific target org	gan toxicity - repeated exposure
	STOT - repeated	<b>exposure</b> Not classified as a specific target organ toxicant after repeated exposure.
	Aspiration hazard	
	Aspiration hazard	Not relevant.
SECTION 1	2: Ecological inform	nation
Ecotoxicity		Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment.
12.1. Toxicit	У	
Toxicity		The product is not believed to present a hazard due to its physical nature.
Acute aquat Summary		Based on available data the classification criteria are not met.
Chronic aqu Summary	atic toxicity	Based on available data the classification criteria are not met.
Ecological in	nformation on ingre	dients.
		Calcium sulfate dihydrate
	Toxicity	Not toxic at limit of water solubility.
12.2. Persis	tence and degradal	bility
Persistence	and degradability	The product contains mainly inorganic substances which are not biodegradable.
Ecological ir	nformation on ingre	dients.
		Calcium sulfate dihydrate
	Biodegradation	Substance is inorganic. Not relevant.
12.3. Bioacc	cumulative potential	<u>.</u>
Bioaccumula	ative potential	No data available on bioaccumulation.
Partition coe	efficient	Not determined.
Ecological in	nformation on ingre	dients.
		Calcium sulfate dihydrate
	Bioaccumulative p	potential Bioaccumulation is unlikely.
12.4. Mobilit	y in soil	
Mobility	<u>.                                    </u>	The product is insoluble in water.
Ecological ir	nformation on ingre	dients.
		Calcium sulfate dihydrate
	Mobility	The product has poor water-solubility.
<u>12.5. Res</u> ult	s of PBT and vPvB	assessment

**Results of PBT and vPvB** This product does not contain any substances classified as PBT or vPvB. assessment

Ecological information on ingredients.

Calcium sulfate dihydrate

**Results of PBT and vPvB** This substance is not classified as PBT or vPvB according to current EU criteria. assessment

# 12.6. Other adverse effects

Other adverse effects None known.

**SECTION 13: Disposal considerations** 

## 13.1. Waste treatment methods

General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.

#### **SECTION 14: Transport information**

 
 General
 The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).

# 14.1. UN number

Not applicable.

# 14.2. UN proper shipping name

Not applicable.

# 14.3. Transport hazard class(es)

No transport warning sign required.

#### 14.4. Packing group

Not applicable.

# 14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant No.

### 14.6. Special precautions for user

Not applicable.

# 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

# **SECTION 15: Regulatory information** ...

National regulations	Health and Safety at Work etc. Act 1974 (as amended).
	The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment
	Regulations 2009 (SI 2009 No. 1348) (as amended) ["CDG 2009"].
	EH40/2005 Workplace exposure limits.
EU legislation	Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18
	December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of
	Chemicals (REACH) (as amended).
	Commission Regulation (EU) No 2015/830 of 28 May 2015.
	Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16
	December 2008 on classification, labelling and packaging of substances and mixtures (a amended).

# 15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information		
Abbreviations and acronyms used in the safety data sheet	ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.	
	ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways.	
	RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail.	
	IATA: International Air Transport Association.	
	ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air.	
	IMDG: International Maritime Dangerous Goods.	
	CAS: Chemical Abstracts Service.	
	ATE: Acute Toxicity Estimate.	
	$LC_{50}$ : Lethal Concentration to 50 % of a test population.	
	$LD_{50}$ : Lethal Dose to 50% of a test population (Median Lethal Dose). EC <sub>50</sub> : 50% of maximal Effective Concentration.	
	PBT: Persistent, Bioaccumulative and Toxic substance.	
	vPvB: Very Persistent and Very Bioaccumulative.	
General information	This SDS is not mandated under REACH Regulation (EC) No 1907/2006 and is provided for information only. As supplied, this product does not meet the requirements for labelling.	
Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.	
Document code	BG-SDS-022	
Revision comments	This is the first issue.	
Revision date	10/12/2019	
Revision	01	
SDS number	9034
